

CARLO IVÁN RAMÍREZ ÁLVAREZ

Zapopan, Mexico | LinkedIn: [linkedin.com/in/carlormz](https://www.linkedin.com/in/carlormz) | GitHub: github.com/CaIvn26
Email: carloivan2000@hotmail.com | Phone: +52 442 823 8697

PROFESSIONAL PROFILE

Analytical and proactive Biomedical Engineer transitioning into **Quality Assurance**, with hands-on experience in **software testing**, **system operations**, and **process optimization**. Skilled in **Linux environments**, **Agile workflows**, and **test case design**. Recognized for improving **efficiency and reliability** through structured testing, **clear documentation**, and effective **cross-team collaboration**.

EDUCATION

TripleTen – Bootcamp QA Engineer

Diciembre 2025 – Presente

Guadalajara, Mexico.

Universidad Autónoma de Querétaro — Biomedical Engineer

Graduated in 2023

Santiago de Querétaro, Mexico

PROFESSIONAL EXPERIENCE

Tata Consultancy Services — Software Engineer

Zapopan, Mexico | Oct 2023 – Present

Key Contributions:

- Streamlined administrative and reporting tasks using advanced Excel workflows, reducing completion times and improving accuracy.
- Proposed the use of AI-assisted monitoring tools for array performance analysis, contributing to smarter infrastructure supervision.
- Collaborated with ENS and EDC teams to perform building checks, array validations, and switch inspections, expanding responsibilities beyond initial scope.

Activities:

- Provided technical support and troubleshooting for Morgan Stanley enterprise systems.
- Resolved technical incidents in SAN/NAS storage environments efficiently and consistently within established SLAs.
- Provided operational support and performed preventive maintenance tasks to ensure infrastructure stability and data integrity.

Technologies Used:

Linux, NAS/SAN, Excel, Infrastructure Monitoring, Data Reporting and Python.

Freelancer — Beta Tester / Quality Assurance
Zapopan, Mexico | Nov 2023 – Apr 2024

Key Contributions:

- Enhanced game stability and UX by identifying over 30 gameplay bugs during testing cycles.
- Maintained a consistent testing schedule, ensuring no release delays due to QA feedback or late reports.
- Contributed five off-scope design and environment improvement suggestions that were successfully implemented by the development team.
- Delivered clear and well-structured documentation, improving communication between QA and developers during iteration cycles.

Activities:

- Conducted functional, regression, and exploratory testing for the video game Twin Paradox.
- Provided detailed feedback on gameplay mechanics, control balance, and visual/UX coherence.
- Assisted in validating builds and updates through Steam and performed environment checks within Unity.

Technologies Used:

Windows, Excel, Steam, Unity, Manual Testing, JIRA

CICESE — Volunteer Research Assistant
Ensenada, BC | Jan 2023 – Jun 2023

Key Contributions:

- Supported the development of MATLAB-based behavioral tracking and image processing tools for neuroscience experiments focused on mouse activity analysis.
- Designed and implemented an electrical circuit that streamlined scorpion venom extraction, cutting the required personnel by half and improving procedural safety.
- Accelerated laboratory data processing by integrating MATLAB and Excel automation, reducing manual workload and minimizing researcher fatigue.
- Developed an image-processing workflow to count bacterial colonies in Petri dishes with greater accuracy and speed, enhancing microbiological data analysis.

Activities:

- Maintained electrical lab equipment and assisted in in vivo model experiments.
- Assisted in data acquisition, and behavioral analysis in neuroscience research.
- Collaborated with multidisciplinary teams to optimize experimental efficiency and data integrity.

Technologies Used:

MATLAB, Python, Data Analysis, Imaging, Electrical Systems.

CERTIFICATIONS & COURSES

- Learning Python (LinkedIn Learning, 2021)
 - Scripting for Testers (LinkedIn Learning, 2018)
 - Eclipse Essential Training (LinkedIn Learning, 2018)
 - Linux: Bash Shell and Scripting (LinkedIn Learning, 2018)
 - SQL: Data Reporting and Analysis (LinkedIn Learning, 2019)
-

ACHIEVEMENTS

- Improved testing efficiency by automating key QA workflows with Python and Selenium, reducing manual execution time during web testing and validation tasks.
 - Optimized personal testing pipelines through custom Python scripts, including an auto-clicker tool that accelerated bug discovery in gameplay physics and collision systems.
 - Strengthened infrastructure stability by taking initiative in Level 2 (L2) and Level 3 (L3) operations, supporting monitoring and preventive tasks beyond initial role scope.
 - Fostered effective teamwork and streamlined communication across technical and operational teams, ensuring faster workflows, accurate reporting, and goal alignment in diverse environments.
 - Applied programming and testing methodologies across disciplines, integrating principles of software engineering and biomedical engineering to develop analytical, data-driven solutions.
-

CONFERENCES & TALKS

- *Speaker* — “**Skin 2.0**” in Talent Land Guadalajara (2025)
 - *Speaker* — “**Images that Deceive the Brain**” in Neuroscience Conference of synopsis (2023)
-
